

To: Abortion Recovery Facilitators

RE: Sharing Our Testimonies For Healing and Justice

Operation Outcry is a ministry of The Justice Foundation that seeks to end the pain of abortion in America by collecting declarations of the harm of abortion and submitting them in legal cases and legislative issues across the country. We are getting increasing requests for the declarations, making it more important to collect them. This is especially critical now as the trauma to many women is magnified by the abortion pill, which acts as a do-it-yourself, at-home abortion kit. The U.S. Supreme Court has already been influenced by these testimonies. [Click here to view a video on the importance of collecting Declarations.](#)

We are reaching out to abortion recovery facilitators to emphasize the importance and the power of sharing testimonies in the healing process. Many abortion recovery leaders introduce the declaration at the end of their abortion recovery program when talking about “next steps” in the healing journey.

You can access information about us at the Justice Foundation’s Operation Outcry ministry, [www.operationoutcry.org](http://www.operationoutcry.org). Thank you for partnering with us in our efforts to share the truth that abortion hurts women, men and families.

Sincerely,
